Projects Involved

- Car Rental System**
A web-based application developed using PHP and the Tailwind CSS framework. It is designed to streamline the process of managing car rental bookings, vehicle availability, customer interactions, and administrative tasks.
- Blood Bank Management System**
A platform built with Laravel and Tailwind CSS to quickly connect blood donors with hospitals and emergency services, ensuring timely responses. Developed during an intra-college hackathon.
- Portfolio Website**
Created a portfolio website using HTML, CSS, and JavaScript, It serves as a platform to introduce myself, share my projects, and provide information about my education and internship.
